Information about the subject

Degree: Bachelor of Science Degree in Biotechnology

Faculty: Faculty of Veterinary Medicine and Experimental Sciences

Code: 1100204 **Name:** Animal Physiology

Credits: 6,00 **ECTS Year:** 2 **Semester:** 2

Module: Fundamentals of Biology

Subject Matter: Animal physiology **Type:** Compulsory

Department: -

Type of learning: Classroom-based learning

Languages in which it is taught: Spanish

Lecturer/-s:

Course guide

Module organization

Fundamentals of Biology

Subject Matter	ECTS	Subject	ECTS	Year/semester
Biology	12,00	Cell Biology	6,00	1/1
		Plant and Animal Biology	6,00	1/1
Animal physiology	6,00	Animal Physiology	6,00	2/2
Plant Biology	6,00	Plant Physiology	6,00	2/1
Microbiology	6,00	Microbiology	6,00	2/1
Virology	6,00	Virology	6,00	3/2

Learning outcomes

At the end of the course, the student must be able to prove that he/she has acquired the following learning outcomes:

R1   The student has understood and assimilated the contents of the subject.

R2   The student is able to solve problems or case studies related to the subject contents, by using different resources (bibliographic, IT, etc.)

R3   The student is able to work in a laboratory, carrying out basic operations correctly and taking into account the corresponding safety standards. He/she understands the planning, development and purpose of the experience, and is able to contrast and validate the obtained results.

R4   The student is able to write an intelligible and organized text on different aspects of the subject.

R5   The student is able to present and defend his/her work adequately.

R6   The student seeks bibliographic information from different sources and can analyze it with a critical and constructive spirit.

R7   The student collaborates with the teacher and his/her peers throughout the learning process; he/she works in a team; treats everyone with respects, is proactive and fulfills the organization rules of the course.

Competencies

Depending on the learning outcomes, the competencies to which the subject contributes are (please score from 1 to 4, being 4 the highest score):

BASIC		Weighting			
		1	2	3	4
CB1	Students acquire and understand knowledge in their field of study based on general secondary education but usually reaching a level that, although supported on advanced text books, also includes aspects involving state-of-the-art knowledge specific to their area.			x	
CB2	Students are able to apply knowledge to their work in a professional way and have the competences enabling them to state and defend views and opinions as well as perform problem-solving tasks in their field of study.			x	
CB3	Students are able to collect and interpret relevant data (generally in their field of study) and give opinions that involve reflection on relevant social, scientific or ethical issues.			x	
CB4	Students can communicate information, ideas, problems and solutions to a specialized or non-specialized audience.			x	
CB5	Students develop the necessary learning skills to undertake further studies with a high level of autonomy.				x

GENERAL		Weighting			
		1	2	3	4
CG01	Capacity to analyze and synthesize.			x	

SPECIFIC		Weighting			
		1	2	3	4
CE22	Knowing and understanding contents, principles and theories related to biotechnology.			x	

		1	2	3	4
CE23	Knowing how to use laboratory equipment and to carry out basic operations for each discipline including: safety measures, handling, waste disposal and activity register.				x
CE24	Knowing basic and instrument laboratory techniques in the different areas of biotechnology.				x
CE25	Knowing how to analyze and understand scientific data related to biotechnology.			x	
CE26	To understand and identify the mechanisms that influence genetic inheritance			x	
CE30	Solving and analyzing problems posed by biotechnology.			x	
CE31	Describing and calculating important variables of processes and experiments.			x	
CE34	Knowing main characteristics of Molecular biosciences and biotechnology communication.			x	

TRANSVERSAL		Weighting			
		1	2	3	4
CT02	Capacity to organize and plan.			x	
CT03	Mastering Spanish oral and written communication.			x	
CT05	Knowing and applying Basic ITC skills related to Biotechnology.	x			
CT06	Capacity to manage information (capacity to look for and analyze information coming from different types of sources).		x		
CT07	Problem solving.	x			
CT08	Decision making		x		
CT09	Capacity to work in interdisciplinary and multidisciplinary team.		x		
CT10	Interpersonal skills.		x		
CT11	Understanding multicultural and diverse environment	x			

CT12	Critical and self-critical capacity.		X	
CT13	Ethics.		X	
CT14	Capacity to learn			X
CT15	Capacity to adapt to new situations		X	
CT16	Capacity to produce new ideas (creativity)	X		
CT17	Leadership abilities		X	
CT18	Taking initiatives and enterprising spirit	X		
CT19	Capacity to apply theoretical knowledge		X	
CT20	Research skills			X
CT21	Sensitivity to environmental issues		X	

Assessment system for the acquisition of competencies and grading system

Assessed learning outcomes	Granted percentage	Assessment method
	60,00%	Written test
	10,00%	Submission of papers
	30,00%	Laboratory test

Observations

Each of the parts must be approved to pass the course. The minimum passing grade is 5 out of 10.

MENTION OF DISTINCTION:

According to Article 22 of the Regulations governing the Evaluation and Qualification of UCV Courses, the mention of "Distinction of Honor" may be awarded by the professor responsible for the course to students who have obtained, at least, the qualification of 9 over 10 ("Sobresaliente"). The number of "Distinction of Honor" mentions that may be awarded may not exceed five percent of the number of students included in the same official record, unless this number is lower than 20, in which case only one "Distinction of Honor" may be awarded.

Learning activities

The following methodologies will be used so that the students can achieve the learning outcomes of the subject:

M1   Teacher presentation of contents, analysis of competences, explanation and in-class display of skills, abilities and knowledge.

M2   Group work sessions supervised by the professor. Case studies, diagnostic tests, problems, field work, computer room, visits, data search, libraries, on-line, Internet, etc. Meaningful construction of knowledge through interaction and student activity.

M3   Activities carried out in spaces with specialized equipment.

M4   Supervised monographic sessions with shared participation..

M5   Application of multidisciplinary knowledge.

M6   Personalized and small group attention. Period of instruction and/or guidance carried out by a tutor to review and discuss materials and topics presented in classes, seminars, readings, papers, etc.

M7   Set of oral and/or written tests used in initial, formative or additive assessment of the student

M8   Group preparation of readings, essays, problem-solving, seminars, papers, reports, etc. to be presented or submitted in theoretical , practical and/or small-group tutoring sessions. Work done on the university e-learning.

M9   Student's study: Individual preparation of readings, essays, problem-solving, seminars, papers, reports, etc. to be presented or submitted in theoretical, practical and/or small-group tutoring sessions. Work done on the university e-learning platform.

IN-CLASS LEARNING ACTIVITIES

	LEARNING OUTCOMES	HOURS	ECTS
ON-CAMPUS CLASS M1	R1, R2, R5, R6	37,40	1,50
PRACTICAL CLASSES M2	R2, R3, R6, R7	4,20	0,17
LABORATORY M3	R3	10,40	0,42
SEMINAR M4	R5, R6, R7	2,00	0,08
GROUP PRESENTATION OF ASSIGNMENTS M5	R5, R6, R7	2,00	0,08
TUTORIAL M6	R1, R2, R4, R5, R6	2,00	0,08
ASSESSMENT M7	R1, R2, R3, R4, R5, R6	2,00	0,08
TOTAL		**60,00**	**2,40**

LEARNING ACTIVITIES OF AUTONOMOUS WORK

	LEARNING OUTCOMES	HOURS	ECTS
AUTONOMOUS GROUP WORK M8	R1, R2, R3, R4, R5, R6, R7	17,90	0,72
AUTONOMOUS INDIVIDUAL WORK M9	R1, R2, R3, R4, R5, R6, R7	72,10	2,88
TOTAL		**90,00**	**3,60**

Description of the contents

Description of the necessary contents to acquire the learning outcomes.

Theoretical contents:

Content block	Contents
1. Introduction to animal physiology	Basics Relationship between structure and function Histology
2. The cell membrane and cell excitability	Transport mechanisms Membrane potential and action potential Signal propagation
3. The nervous system	General characteristics Types of nerve cells Sensory systems in general
4 Physiology of movement	Muscular structure Mechanics of muscle contraction and its regulation
5. Respiratory system	Introduction and general concepts Oxygen and carbon dioxide in the blood: transport Gas transfer in the air: lungs Regulation pH corporal
6. Fluids and circulation.	The heart Arterial and venous system Regulation of circulation Circulatory systems
7. Excretory system	Renal physiology and their excretory ducts Urinari system and excretion of nitrogen
8. Food digestion and absorption	Catabolism and anabolism Nutritional needs Digestion and absorption

Course guide

9. Endocrine system.

Hormone secretion and transport
Mainly hormones and their regulation

10. Reproduction and development.

Types of reproduction
Morphology of reproductive organs
Fertilization
Growth and development

11. PRACTICAL BLOCK

PR1. Handling of laboratory animals, anatomy and histology.
PR2. Hematology: Obtaining plasma and blood serum.
Hematocrit value. Anticoagulants Blood count and leukocyte
formula
PR3 Electrocardiography
PR4. Urinalysis
PR5. Gamete Physiology
P.C 1 PRACTICAL PROBLEM RESOLUTION
P.C 2 GROUP ACTIVITY

Organization of the practical activities:

	Content	Place	Hours
PR1.	Handling of laboratory animals, anatomy and histology.	Laboratory	2,00
PR2.	Hematology: Obtaining plasma and blood serum. Hematocritvalue. Anticoagulants Blood count and leukocyte formula	Laboratory	2,00
PR3.	Electrocardiography	Laboratory	2,00
PR4.	Urinalysis	Laboratory	2,00
PR5.	Gamete Physiology	Laboratory	2,00
PR6.	SOLVED PRACTICAL PROBLEM	Lecture room	2,50
PR7.	GROUP ACTIVITY	Computer	2,50

Temporary organization of learning:

Block of content	Number of sessions	Hours
1. Introduction to animal physiology	2,00	4,00
2. The cell membrane and cell excitability	2,00	4,00
3. The nervous system	4,00	8,00
4 Physiology of movement	2,00	4,00
5. Respiratory system	2,00	4,00
6. Fluids and circulation.	2,00	4,00
7. Excretory system	2,00	4,00
8. Food digestion and absorption	2,00	4,00
9. Endocrine system.	2,50	5,00
10. Reproduction and development.	2,00	4,00
11. PRACTICAL BLOCK	7,50	15,00
