

Information about the subject

Degree: Bachelor of Science Degree in Biotechnology

Faculty: Faculty of Veterinary Medicine and Experimental Sciences

Code: 1100303 **Name:** Cell Culture

Credits: 6,00 **ECTS Year:** 3 **Semester:** 2

Module: Bioengineering and Biotechnological Processes

Subject Matter: Cell Culture **Type:** Compulsory

Field of knowledge: Ciencias de la Salud

Department: Biotechnology

Type of learning: Classroom-based learning

Languages in which it is taught: Spanish

Lecturer/-s:

1103	<u>Maria Victoria Moreno Manzano</u> (Responsible Lecturer)	mv.moreno@ucv.es
1105D	<u>Maria Victoria Moreno Manzano</u> (Responsible Lecturer)	mv.moreno@ucv.es

Module organization

Bioengineering and Biotechnological Processes

Subject Matter	ECTS	Subject	ECTS	Year/semester
Genetic Engineering	6,00	Genetic and Molecular Engineering	6,00	3/2
Bioreactors	6,00	Bioreactors	6,00	3/2
Biochemical Engineering	6,00	Biochemical Engineering	6,00	3/1
Plant and Animal Biotechnology	6,00	Plant and Animal Biotechnology	6,00	3/2
Cell Culture	6,00	Cell Culture	6,00	3/2
Biotechnological Processes and Products	6,00	Biotechnological Processes and Products	6,00	4/1

Recommended knowledge

Cell biology; Biochemistry; Metabolic routes; Instrumental Techniques

Learning outcomes

At the end of the course, the student must be able to prove that he/she has acquired the following learning outcomes:

- R1 The student has understood and assimilated the contents of the subject.
- R2 The student is able to solve problems or case studies related to the subject contents, by using different resources (bibliographic, IT, etc.)
- R3 The student is able to work in a laboratory, carrying out basic operations correctly and taking into account the corresponding safety standards. He/she understands the planning, development and purpose of the experience, and is able to contrast and validate the obtained results.
- R4 The student is able to write an intelligible and organized text on different aspects of the subject.
- R5 The student is able to present and defend his/her work adequately.
- R6 The student seeks bibliographic information from different sources and can analyze it with a critical and constructive spirit.
- R7 The student collaborates with the teacher and his/her peers throughout the learning process; he/she works in a team; treats everyone with respects, is proactive and fulfills the organization rules of the course.

Competencies

Depending on the learning outcomes, the competencies to which the subject contributes are (please score from 1 to 4, being 4 the highest score):

BASIC		Weighting			
		1	2	3	4
CB1	Students acquire and understand knowledge in their field of study based on general secondary education but usually reaching a level that, although supported on advanced text books, also includes aspects involving state-of-the-art knowledge specific to their area.			X	
CB2	Students are able to apply knowledge to their work in a professional way and have the competences enabling them to state and defend views and opinions as well as perform problem-solving tasks in their field of study.			X	
CB3	Students are able to collect and interpret relevant data (generally in their field of study) and give opinions that involve reflection on relevant social, scientific or ethical issues.		X		
CB4	Students can communicate information, ideas, problems and solutions to a specialized or non-specialized audience.			X	
CB5	Students develop the necessary learning skills to undertake further studies with a high level of autonomy.				X

GENERAL		Weighting			
		1	2	3	4
CG01	Capacity to analyze and synthesize.				X

SPECIFIC		Weighting			
		1	2	3	4
CE22	Knowing and understanding contents, principles and theories related to biotechnology.				X

CE23	Knowing how to use laboratory equipment and to carry out basic operations for each discipline including: safety measures, handling, waste disposal and activity register.									X
CE24	Knowing basic and instrument laboratory techniques in the different areas of biotechnology.									X
CE25	Knowing how to analyze and understand scientific data related to biotechnology.									X
CE27	Knowing and applying action plans and assessment criteria of biotechnology processes.									X
CE28	Integrating life science and Engineering into processes of development of biotechnological products and applications.									X
CE29	Contrasting and checking results of biotechnological experimentation.									X
CE30	Solving and analyzing problems posed by biotechnology.									X
CE31	Describing and calculating important variables of processes and experiments.									X
CE32	Knowing how to use different specific operating systems and software packages designed for Biotechnology.							X		
CE33	Knowing and complying with legislation and ethics of biotechnological processes and applications.									X
CE34	Knowing main characteristics of Molecular biosciences and biotechnology communication.							X		

TRANSVERSAL		Weighting			
		1	2	3	4
CT02	Capacity to organize and plan.			X	
CT03	Mastering Spanish oral and written communication.			X	
CT05	Knowing and applying Basic ITC skills related to Biotechnology.			X	
CT06	Capacity to manage information (capacity to look for and analyze information coming from different types of sources).			X	
CT07	Problem solving.			X	

CT09	Capacity to work in interdisciplinary and multidisciplinary team.			X
CT10	Interpersonal skills.	X		
CT12	Critical and self-critical capacity.	X		
CT13	Ethics.	X		
CT14	Capacity to learn			X
CT16	Capacity to produce new ideas (creativity)			X
CT17	Leadership abilities	X		
CT18	Taking initiatives and enterprising spirit	X		
CT19	Capacity to apply theoretical knowledge			X
CT20	Research skills			X
CT21	Sensitivity to environmental issues	X		

Assessment system for the acquisition of competencies and grading system

Assessed learning outcomes	Granted percentage	Assessment method
R1, R2, R3, R4, R5, R6, R7	60,00%	Written test
R1, R2, R3, R4, R5, R6, R7	20,00%	Submission of papers
R1, R2, R3, R4, R5, R6, R7	20,00%	Laboratory test

Observations

According to the general evaluation and qualification regulations, the preferred evaluation system will be by means of continuous evaluation:

The delivery of the work will be assessed according to a system of continuous assessment through deliveries where the development of the work will be reviewed.

The student must obtain at least 50% of the highest score in the "written test".

Attendance to laboratory sessions is mandatory (absences should be justified).

The mention of Distinction will be awarded to students who have achieved a score equal to or greater than 9.0. The number of Distinctions granted will not exceed 5% of students enrolled in a subject in the corresponding academic year unless enrollment is under 20, in which case only one Distinction may be granted (Royal Decree 1125/2003).

MENTION OF DISTINCTION:

In accordance with the regulations governing the assessment and grading of subjects in force at UCV, the distinction of "Matrícula de Honor" (Honours with Distinction) may be awarded to students who have achieved a grade of 9.0 or higher. The number of "Matrículas de Honor" (Honours with Distinction) may not exceed five percent of the students enrolled in the group for the corresponding academic year, unless the number of enrolled students is fewer than 20, in which case a single "Matrícula de Honor" (Honours with 9 Distinction) may be awarded. Exceptionally, these distinctions may be assigned globally across different groups of the same subject. Nevertheless, the total number of distinctions awarded will be the same as if they were assigned by group, but they may be distributed among all students based on a common criterion, regardless of the group to which they belong. The criteria for awarding "Matrícula de Honor" (Honours with Distinction) will be determined according to the guidelines stipulated by the professor responsible for the course, as detailed in the "Observations" section of the evaluation system in the course guide.

Learning activities

The following methodologies will be used so that the students can achieve the learning outcomes of the subject:

- M1 Teacher presentation of contents, analysis of competences, explanation and in-class display of skills, abilities and knowledge.
- M2 Group work sessions supervised by the professor. Case studies, diagnostic tests, problems, field work, computer room, visits, data search, libraries, on-line, Internet, etc. Meaningful construction of knowledge through interaction and student activity.
- M3 Activities carried out in spaces with specialized equipment.
- M4 Supervised monographic sessions with shared participation..
- M5 Application of multidisciplinary knowledge.
- M6 Personalized and small group attention. Period of instruction and/or guidance carried out by a tutor to review and discuss materials and topics presented in classes, seminars, readings, papers, etc.
- M7 Set of oral and/or written tests used in initial, formative or additive assessment of the student
- M8 Group preparation of readings, essays, problem-solving, seminars, papers, reports, etc. to be presented or submitted in theoretical , practical and/or small-group tutoring sessions. Work done on the university e-learning.
- M9 Student's study: Individual preparation of readings, essays, problem-solving, seminars, papers, reports, etc. to be presented or submitted in theoretical, practical and/or small-group tutoring sessions. Work done on the university e-learning platform.

IN-CLASS LEARNING ACTIVITIES

	LEARNING OUTCOMES	HOURS	ECTS
ON-CAMPUS CLASS M1	R1, R2, R4, R5, R6, R7	28,00	1,12
LABORATORY M3	R1, R2, R3, R4, R5, R6, R7	20,00	0,80
SEMINAR M4	R1, R2, R4, R5, R6, R7	6,00	0,24
GROUP PRESENTATION OF ASSIGNMENTS M5	R1, R2, R4, R5, R6	2,00	0,08
TUTORIAL M6	R1, R7	2,00	0,08
ASSESSMENT M7	R1, R2, R3, R4, R5, R6, R7	2,00	0,08
TOTAL		60,00	2,40

LEARNING ACTIVITIES OF AUTONOMOUS WORK

	LEARNING OUTCOMES	HOURS	ECTS
AUTONOMOUS GROUP WORK M8	R1, R2, R4, R6, R7	18,00	0,72
AUTONOMOUS INDIVIDUAL WORK M9	R1, R2, R4, R5, R6, R7	72,00	2,88
TOTAL		90,00	3,60

Description of the contents

Description of the necessary contents to acquire the learning outcomes.

Theoretical contents:

Content block	Contents
UNIT 1	Subject 1: Conceptual base Subject 2: Principal characteristics of the work with cellular cultures. Historical beginnings in the cellular cultures. Subject 3: Cellular biology applied to the cellular cultures: cytoskeleton, cell signaling, energy, cell cycle, intercellular unions.
UNIT 2	Subject 4: Working in the laboratory: Essential material in a laboratory of cellular cultures. Subject 5: Properties of the cultura medias. Nutritive requirements. Subject 6: Asepsis in the laboratory.
UNIT 3	Subject 7: Types of cultures: Types of cellular cultures according to his origin and treatment. Subject 8: Characteristics, extraction and maintenance.
UNIT 4	Subject 9: Technologies and methods used in cellular cultures: Culture of cells in suspension and adherents. Subject 10: Optical microscopy, fluorescence and confocal. Flow cytometry.
UNIT 5	Subject 11: Application of cell cultures to Regenerative Medicine Subject 12: Recent advances in the field of cell cultures and its application on Biotechnology

UNIT 6

Lab Sessions:

Basic equipment of a laboratory of cellular cultures.

Asepsis and good practices in the laboratory of cultures.

Thawing, freezing and subculture.

Cell toxicity assay

Immunoassay

Cell culture characterization: proliferation and migration,
analysis, cell fate determination

Primary cell culture generation

Organization of the practical activities:

	Content	Place	Hours
PR1.	Introduction to cell cultures: Types of cultures and cell types, Equipment and laboratory work procedures, Consumibles and standard solutions, biological safety standards	Laboratory	2,00
PR2.	Cell Culture Laboratory standard work I: continuous cell line management	Laboratory	2,00
PR3.	Cell Culture Laboratory standard work II: amplification, cell counting, plating into multiwell plates	Laboratory	2,00
PR4.	Cell Culture Laboratory standard work III: Immunoassay and staining with fluorescence probes for molecular analysis	Laboratory	2,00
PR5.	Cell Culture Laboratory standard work IV: detection of contaminations, criopreservations	Laboratory	2,00
PR6.	Cell Culture Laboratory standard work V: citotoxicity assay in a multiwell system	Laboratory	2,00
PR7.	Primary cell culture of precursors cells from adipose tissue	Laboratory	2,00
PR8.	Cell toxicity assay part II	Laboratory	2,00
PR9.	Analysis of the Immunoassays and fluorescence probes with high resolution microscopy	Laboratory	2,00
PR10.	Cell population analysis	Laboratory	2,00

Temporary organization of learning:

Block of content	Number of sessions	Hours
UNIT 1	2,00	4,00
UNIT 2	3,00	6,00
UNIT 3	5,00	10,00
UNIT 4	5,00	10,00
UNIT 5	5,00	10,00
UNIT 6	10,00	20,00
