## Learning outcomes

At the end of the course, the student must be able to prove that he/she has acquired the following learning outcomes:

- R1 The student is able to acquire a synthetic vision of some central aspects of anthropological thought.
- R2 The student describes with ease the characteristics of the different forms of knowledge (technique, science, philosophy, theology) that allow to have a wide and integrated-and not reduced- vision of the human being.
- R3 The student knows how to differentiate the essential human capacities (intelligence, will, affectivity) that make personal self-development possible and thus contribute to improving personality.
- R4 The student knows how to identify the fundamental traits of the human person that manifest his/her dignity, his/her freedom of self-determination, his/her sociability and his/her openness to transcendence.
- R5 The student is capable of elaborating works of analysis and synthesis with arguments of anthropology about the existential realities of the person and the limits of life, by using as sources academic texts, audiovisual materials, press, media or the Internet.
- R6 The student is able to critically discuss anthropological issues respecting the opinions of others and demonstrating scientific rigor.
- R7 The student knows how to confront socio-cultural anthropological proposals with the contributions of other knowledge about man, especially psychology, economics, law, philosophy and theology.
- R8 The student is able to situate the nature, the object and the method of anthropology.

## Assessment system for the acquisition of competencies and grading system

Assessed learning outcomes	Granted percentage	Assessment method
	60,00%	Written test with theoretical and practical questions
	30,00%	Delivery of guided assignments, whose objectives and contents will be proposed by the teacher
	10,00%	Oral presentation

### Observations

According to the general evaluation and qualification regulations, the preferred evaluation system will be by means of continuous evaluation. The continuous evaluation will involve two non-eliminatory partial controls, in addition to the final exam. These partial exams will be adapted to the scheme of the final exam, although the number of topics will be restricted to those actually covered up to the date of the test.

Finally, according to article 10 of the current assessment regulations, in the event that it is impossible for students enrolled in a face-to-face degree to attend, they may opt for 'single assessment'. This is an extraordinary and exceptional assessment system available to those students who, in a justified and accredited manner, are unable to undergo the continuous assessment system and request it within the first month of each semester, by the means provided for this purpose. The Dean of the Faculty shall decide on the admission of the student's request for a single assessment.

## MENTION OF DISTINCTION:

In accordance with the regulations governing the assessment and grading of subjects in force at UCV, the distinction of "Matrícula de Honor" (Honours with Distinction) may be awarded to students who have achieved a grade of 9.0 or higher. The number of "Matrículas de Honor" (Honours with Distinction) may not exceed five percent of the students enrolled in the group for the corresponding academic year, unless the number of enrolled students is fewer than 20, in which case a single "Matrícula de Honor" (Honours with 9 Distinction) may be awarded. Exceptionally, these distinctions may be assigned globally across different groups of the same subject. Nevertheless, the total number of distinctions awarded will be the same as if they were assigned by group, but they may be distributed among all students based on a common criterion, regardless of the group to which they belong. The criteria for awarding "Matrícula de Honor" (Honours with Distinction) will be determined according to the guidelines stipulated by the professor responsible for the course, as detailed in the "Observations" section of the evaluation system in the course guide.

## Learning activities

The following methodologies will be used so that the students can achieve the learning outcomes of the subject:

- M1 Teacher presentation of contents, analysis of competences, explanation and in-class display of skills, abilities and knowledge.
- M2 Group work sessions supervised by the professor. Case studies, diagnostic tests, problems, field work, computer room, visits, data search, libraries, on-line, Internet, etc. Meaningful construction of knowledge through interaction and student activity.
- M6 Personalized and small group attention. Period of instruction and/or guidance carried out by a tutor to review and discuss materials and topics presented in classes, seminars, readings, papers, etc.
- M8 Set of oral and/or written tests used in initial, formative or additive assessment of the student.
- M9 Group preparation of readings, essays, problem-solving, seminars, papers, reports, etc. to be presented or submitted in theoretical, practical and/or small-group tutoring sessions. Work done on the university e-learning platform ([www.plataforma.ucv.es](http://www.plataforma.ucv.es))
- M10 Student's study: Individual preparation of readings, essays, problem-solving, seminars, papers, reports, etc. to be presented or submitted in theoretical, practical and/or small-group tutoring sessions. Work done on the university e-learning platform ([www.plataforma.ucv.es](http://www.plataforma.ucv.es)).
