

Information about the subject

Degree: Bachelor of Degree in Marine Sciences

Faculty: Faculty of Veterinary Medicine and Experimental Sciences

Code: 272008 **Name:** Geographic Information Systems and Remote Sensing

Credits: 6,00 **ECTS Year:** 2 **Semester:** 1

Module: Transversal Knowledge and Techniques in Marine Sciences

Subject Matter: Geographic Information Systems and Remote Sensing **Type:** Compulsory

Department: Oceanography and Environment

Type of learning: Classroom-based learning

Languages in which it is taught: Spanish

Lecturer/-s:

272A	<u>Ana Maria Blázquez Morilla</u> (Responsible Lecturer)	ana.blazquez@ucv.es
	<u>Francesc De Borja Martinez-Clavel Valles</u>	fdb.martinezclavel@ucv.es

Module organization

Transversal Knowledge and Techniques in Marine Sciences

Subject Matter	ECTS	Subject	ECTS	Year/semester
Organisms and Systems	30,00	Marine Botany	6,00	2/2
		Marine Ecology	6,00	3/2
		Marine Microbiology	6,00	2/2
		Marine Zoology	6,00	2/1
		Physiology of Marine Organisms	6,00	2/2
Marine Geology	12,00	Geophysics and Tectonics	6,00	2/1
		Sedimentology	6,00	2/2
Geographic Information Systems and Remote Sensing	6,00	Geographic Information Systems and Remote Sensing	6,00	2/1
Statistics	6,00	Applied Statistics	6,00	2/1

Learning outcomes

At the end of the course, the student must be able to prove that he/she has acquired the following learning outcomes:

- R1 The student understands the map as a source of information, instrument of analysis and means of expression. He/she can use the different scales correctly.
- R2 The student seeks information (cartographic, bibliographic, legislation) from different sources and knows how to analyse it from a critical point of view.
- R3 The student creates and uses Geographic Information Systems (its components and functions) as a tool for analysis and management of the coastal and marine environment.
- R4 The student creates and uses Geographic Information Systems (its components and functions) as a tool for analysis and management of the coastal and marine environment.
- R5 The student applies the Geographic Information Systems as an instrument of territorial planning in the marine and coastal environment.
- R6 The student interprets and recognizes the topographic map as a basic cartographic element.

Competencies

Depending on the learning outcomes, the competencies to which the subject contributes are (please score from 1 to 4, being 4 the highest score):

BASIC	Weighting			
	1	2	3	4
CB2 Students are able to apply knowledge to their work in a professional way and have the competences enabling them to state and defend views and opinions as well as perform problem-solving tasks in their field of study.				X
CB5 Students develop the necessary learning skills to undertake further studies with a high level of autonomy.				X

GENERAL	Weighting			
	1	2	3	4
CG1 Capacity to analyze and synthesize				X
CG2 Capacity to organize and plan			X	
CG3 Mastering Spanish oral and written communication		X		
CG5 Knowing and applying Basic ITC skills related to marine science				X
CG6 Capacity to manage information (capacity to look for and analyze information coming from different types of sources)				X
CG7 Decision making				X
CG8 Capacity to work in interdisciplinary and multidisciplinary team			X	
CG10 Critical and self-critical capacity				X
CG11 Capacity to learn				X
CG12 Capacity to adapt to new situations			X	

CG13	Capacity to produce new ideas (creativity)				X
CG16	Capacity to apply theoretical knowledge				X
CG18	Sensibility to environmental issues.		X		

SPECIFIC		Weighting			
		1	2	3	4
CE2	Knowing basic sampling techniques of water column, organisms, sediment and sea-bottoms as well as basic techniques of dynamic and structural variable measurement	X			
CE6	Applying marine instrument techniques			X	
CE7	Collecting, assessing, processing and interpreting oceanographic data, following the most recent theories	X			
CE8	Identifying and analyzing new problems and proposing solution strategies			X	
CE9	Knowing how to carry out experiments and measurements both in the laboratory and during sample collection	X			
CE10	Knowing how to use planning, designing and implementing research tools while surveying and assessing results				X
CE11	Knowing how to do fieldwork and laboratory experiments in a safe and responsible way, promoting teamwork	X			
CE12	Describing, classifying and mapping sea bottoms and coastal areas				X
CE13	Looking for and assessing different kinds of marine resources	X			
CE20	Mastering practical use of models, including new data for validation, improvement and development of models				X
CE22	Practical experience of methods of marine environmental impact assessment	X			

Assessment system for the acquisition of competencies and grading system

Assessed learning outcomes	Granted percentage	Assessment method
	40,00%	Written test with theoretical and practical questions
	20,00%	Delivery of guided assignments, whose objectives and contents will be proposed by the teacher
	30,00%	Problem-solving and issues related to the use of specific software
	10,00%	Oral presentation

Observations

According to the general evaluation and qualification regulations, the preferred evaluation system will be by means of continuous evaluation. Specifically:

Continuous assessment will be applied in the item 'Delivery of assignments directed by the teacher' by means of the delivery in various phases of the project that is the vehicle for the subject.

* Minimum 50% on each item to average with the rest.** The evaluation of the item "**Problem solution with specific software**" will be done by using the Q-GIS during the written test

MENTION OF DISTINCTION:

In accordance with the regulations governing the assessment and grading of subjects in force at UCV, the distinction of "Matrícula de Honor" (Honours with Distinction) may be awarded to students who have achieved a grade of 9.0 or higher. The number of "Matrículas de Honor" (Honours with Distinction) may not exceed five percent of the students enrolled in the group for the corresponding academic year, unless the number of enrolled students is fewer than 20, in which case a single "Matrícula de Honor" (Honours with 9 Distinction) may be awarded. Exceptionally, these distinctions may be assigned globally across different groups of the same subject. Nevertheless, the total number of distinctions awarded will be the same as if they were assigned by group, but they may be distributed among all students based on a common criterion, regardless of the group to which they belong. The criteria for awarding "Matrícula de Honor" (Honours with Distinction) will be determined according to the guidelines stipulated by the professor responsible for the course, as detailed in the "Observations" section of the evaluation system in the course guide.

Learning activities

The following methodologies will be used so that the students can achieve the learning outcomes of the subject:

- M1 Teacher presentation of contents, analysis of competences, explanation and in-class display of skills, abilities and knowledge.
- M2 Group work sessions supervised by the professor. Case studies, diagnostic tests, problems, field work, computer room, visits, data search, libraries, on-line, Internet, etc. Meaningful construction of knowledge through interaction and student activity.
- M3 Activities carried out in spaces with specialized equipment.
- M4 Supervised monographic sessions with shared participation.
- M5 Application of multidisciplinary knowledge.
- M6 Personalized and small group attention. Period of instruction and/or guidance carried out by a tutor to review and discuss materials and topics presented in classes, seminars, readings, papers, etc.
- M8 Set of oral and/or written tests used in initial, formative or additive assessment of the student.
- M9 Group preparation of readings, essays, problem-solving, seminars, papers, reports, etc. to be presented or submitted in theoretical , practical and/or small-group tutoring sessions. Work done on the university e-learning platform (www.plataforma.ucv.es)

IN-CLASS LEARNING ACTIVITIES

	LEARNING OUTCOMES	HOURS	ECTS
ON-CAMPUS CLASS M1	R1, R2, R5, R6	16,00	0,64
PRACTICAL CLASSES M2	R2, R3, R4	36,00	1,44
SEMINAR M4	R2, R3	2,00	0,08
GROUP PRESENTATION OF ASSIGNMENTS M5	R3, R4	2,00	0,08
TUTORIAL M6	R3, R4	2,00	0,08
ASSESSMENT M8	R1, R2, R3, R4, R5, R6	2,00	0,08
TOTAL		60,00	2,40

LEARNING ACTIVITIES OF AUTONOMOUS WORK

	LEARNING OUTCOMES	HOURS	ECTS
GROUP WORK M9	R2, R3, R4, R5	18,00	0,72
INDEPENDENT WORK M8, M9	R1, R2, R3, R4, R5, R6	72,00	2,88
TOTAL		90,00	3,60

Description of the contents

Description of the necessary contents to acquire the learning outcomes.

Theoretical contents:

Content block	Contents
DIDACTIC UNIT I: LEGAL FRAMEWORK OF REGULATIONS	Environmental legislation and planning instruments that regulate the implementation of a wind farm in the Levantine-Balearic demarcation.
DIDACTIC UNIT II: CARTOGRAPHICAL LANGUAGE AND MAP CONSTRUCTION.	Maps, kinds and series of maps. Geoid, coordinate systems, the scale, projection systems. Geographic and UTM coordinates and how to read them. Use and interpretation of thematic and topographic maps. Official Cartography in Spain. Elements in a map.
DIDACTIC UNIT III: GEOGRAPHIC INFORMATION SYSTEMS.	Components of a GIS. Q-GIS. Raster and vector structures, databases. Applications of vector and raster models. Digital models and their application to littoral and marine environments. Map layouts
DIDACTIC UNIT IV: GIS FUNCTIONS.	Information input and storage, transformation of raster / vector data, space analysis and modeling. The cartographical model.
DIDACTIC UNIT V: AERIAL AND SPACE REMOTE SENSING	Physical principles, photogrammetry and photo-interpretation, Earth observation satellites, image digital treatment.

Organization of the practical activities:

	Content	Place	Hours
PR1.	PRACTICES: Visit astronomical laboratory. Conference on Earth in the Solar System. Meteorites.	Technical visit	3,00
PR2.	PRACTICES: Realisation and mapping by means of Geographic Information Systems (QGIS) of a project on the installation of a wind farm in the Levantine-Balearic demarcation.	Computer	32,00

Temporary organization of learning:

Block of content	Number of sessions	Hours
DIDACTIC UNIT I: LEGAL FRAMEWORK OF REGULATIONS	2,00	4,00
DIDACTIC UNIT II: CARTOGRAPHICAL LANGUAGE AND MAP CONSTRUCTION.	5,00	10,00
DIDACTIC UNIT III: GEOGRAPHIC INFORMATION SYSTEMS.	3,00	6,00
DIDACTIC UNIT IV: GIS FUNCTIONS.	15,00	30,00
DIDACTIC UNIT V: AERIAL AND SPACE REMOTE SENSING	5,00	10,00
