## Assessment system for the acquisition of competencies and grading system

Assessed learning outcomes	Granted percentage	Assessment method
R1, R2, R3, R4	80,00%	Written test: Final summative or continuous theoretical and practical test (open questions, objective test questions, truncated exam, etc.). Preparation of fieldwork memorandums. Solution of case studies, single case, etc.
R1, R2, R3, R4	0,00%	Oral presentation of group and individual work.
R1, R2, R3, R4	20,00%	Individual monitoring of attendance at face-to-face sessions and active participation in theoretical and practical classes, seminars and tutorials.

### Observations

The grading instruments are specified below.

Final summative written test (theoretical-practical with short and essay questions): 50%

Reading, research, and reflection on literary texts: 20%

Preparation of didactic proposals to promote reading and literary competence: 20%

Individual monitoring of active participation in theoretical-practical classes: 10%

\* There will be a set of mandatory readings in the subject that each teacher will specify at the beginning of the classes and which will be evaluated.

1. It is necessary to pass the final written exam with a grade equal to or higher than 5, as well as to obtain an overall average in the set of assessment tools equal to or higher than 5 to pass the course. All assignments will have specific execution and submission dates, which must be respected for successful completion of the course.

2. Since the teacher must be a professional of language, and therefore, Order ECI 3857/2007 of December 27 establishes the achievement of a C1 level for students in this degree, the subject must demonstrate correct written expression through written tests, which will be a necessary condition for passing. Specifically, it is a requirement for passing the course not to commit more than five spelling mistakes. Each mistake, without exceeding the permitted limit, will result in a penalty of -0.25 points (out of 10) from the final grade of the exam. Repeated instances of the same error will not be taken into account, nor will punctuation marks (except the comma between subject and predicate).

3. All assignments will have a specific execution and submission date, which must be respected for successful completion of the course.

4. Works that rely on mere copying or uncritical textual summarization will be penalized.

Plagiarism or the use of illicit means will result in the student's failure.

Likewise, considering the mentioned language level and the established descriptors, the subject will contribute to demonstrating competencies such as:

- Writes clear and well-structured presentations on complex topics, highlighting the main ideas. Expands with some length and defends points of view with complementary ideas, reasons, and appropriate examples.
- Understands most lectures, discussions, and debates with relative ease.
- Can take detailed notes during a conference that deals with topics in their field of specialization, transcribing the information so accurately and close to the original that the notes could also be useful to others.
- Understands in great detail a wide range of extensive and complex texts that one may encounter in social, professional, or academic life, and identifies subtle details that include both implicit and explicit attitudes and opinions.

To achieve success in the subject, students are recommended to:

- Carry out daily work related to the subject, maintaining a consistent study habit.
- Access the platform daily to consult materials, announcements, and activities.
- Foster personal autonomy by conducting daily research on doubts arising in class.
- Raise to the teacher any questions that have not been able to be resolved autonomously.
- Plan spatial and temporal strategies to tackle the study.

**Single Evaluation:** Exceptionally, students who cannot undergo the continuous assessment system, for justified and accredited reasons, may opt for this evaluation system. They must request it from their professor and the dean's office within the first month of each semester. *The Faculty's dean's office will decide whether to grant the student's request for single evaluation.*

In this case, the assessment will be as follows: a theoretical-practical exam demonstrating the acquisition of all the learning outcomes outlined in the course syllabus, including questions related to the readings and assignments of the course.

### **CRITERIA FOR THE AWARDING OF HONOURS:**

In accordance with the regulations governing the assessment and grading of subjects in force at UCV, the distinction of "Matrícula de Honor" (Honours with Distinction) may be awarded to students who have achieved a grade of 9.0 or higher. The number of "Matrículas de Honor" (Honours with Distinction) may not exceed five percent of the students enrolled in the group for the corresponding academic year, unless the number of enrolled students is fewer than 20, in which case a single "Matrícula de Honor" (Honours with 9 Distinction) may be awarded. Exceptionally, these distinctions may be assigned globally across different groups of the same subject. Nevertheless, the total number of distinctions awarded will be the same as if they were assigned by group, but they may be distributed among all students based on a common criterion, regardless of the group to which they belong. The criteria for awarding "Matrícula de Honor" (Honours with Distinction) will be determined according to the guidelines stipulated by the professor responsible for the course, as detailed in the "Observations" section of the evaluation system in the course guide.
