

Information about the subject

Degree: Bachelor of Arts Degree in Primary School Education

Faculty: Faculty of Teacher Training and Education Sciences

Code: 1160302 **Name:** Teaching of Mathematics

Credits: 6,00 **ECTS Year:** 3 **Semester:** 2

Module: Teaching and learning of Mathematics

Subject Matter: Mathematics and its Didactics **Type:** Compulsory

Field of knowledge: Social and Legal Science

Department: -

Type of learning: Classroom-based learning / Online

Languages in which it is taught: Spanish

Lecturer/-s:

Module organization

Teaching and learning of Mathematics

Subject Matter	ECTS	Subject	ECTS	Year/semester
Mathematics and its Didactics	15,00	Fundamentals of Arithmetic and Measurement	4,50	1/2
		Fundamentals of Geometry and Information Processing	4,50	3/1
		Teaching of Mathematics	6,00	3/2

Learning outcomes

At the end of the course, the student must be able to prove that he/she has acquired the following learning outcomes:

- R1 The student actively participates in the proposed tasks in class.
- R2 The student uses correct terminology and symbols specific to mathematics.
- R3 The student maintains a high degree of grammatical and spelling accuracy.
- R4 The student values mathematics as a cultural fact.
- R5 The student provides clear and detailed oral and written descriptions and presentations, developing concrete ideas and concluding with appropriate conclusions, while maintaining a high degree of grammatical and spelling accuracy.
- R6 The student designs and proposes activities and resources to work on different mathematical contents suitable for different levels, considering their specific characteristics as well as the difficulties and errors that children may make.

Competencies

Depending on the learning outcomes, the competencies to which the subject contributes are (please score from 1 to 4, being 4 the highest score):

BASIC		Weighting			
		1	2	3	4
CB4	That students will be able to convey information, ideas, problems and solutions to both specialized and non-specialized audiences.			X	

GENERAL		Weighting			
		1	2	3	4
CG1	Understand the curricular areas of Primary Education, the interdisciplinary relationship between them, the evaluation criteria, and the body of didactic knowledge around the respective teaching and learning procedures.		X		
CG2	Design, plan, and evaluate teaching and learning processes, both individually and in collaboration with other teachers and professionals from the school.				X
CG6	Know the organization of primary education schools and the diversity of actions involved in their functioning. Perform tutoring and orientation with students and their families, addressing the singular educational needs of the students. Recognize that the exercise of the teaching function must go on improving and adapting to the scientific, pedagogical, and social changes throughout life.	X			
CG10	Reflect on classroom practices to innovate and improve teaching work. Acquire habits and skills for autonomous and cooperative learning and promote it among students.				X
CG11	Know and apply information and communication technologies in the classrooms. Selectively discern audiovisual information that contributes to learning, civic education, and cultural enrichment.			X	

SPECIFIC	Weighting			
	1	2	3	4
CE36 Acquire basic mathematical competencies (numerical, calculation, geometric, spatial representations, estimation, measurement, organization, and interpretation of information, etc.).	X			
CE37 Know the school curriculum of mathematics.				X
CE38 Analyze, reason, and communicate mathematical proposals.				X
CE39 Pose and solve problems linked to daily life.				X
CE40 Value the relationship between mathematics and sciences as one of the pillars of scientific thinking.				X
CE51 Develop and evaluate curriculum content using appropriate didactic resources and promote the corresponding competencies in students.				X

Assessment system for the acquisition of competencies and grading system

In-class teaching

Assessed learning outcomes	Granted percentage	Assessment method
R1, R2, R3, R4, R5, R6	15,00%	Oral presentation of group and individual works: Self-assessment systems (oral, written, individual, in groups). Oral tests (individual, in groups, presentation of topics or works).
	0,00%	Monitoring of student work in non-face-to-face/distance sessions: Observation techniques, rubrics, checklists. Portfolios.
	0,00%	Active participation in theoretical-practical sessions, seminars, and tutorials: Attitude scale (to gather opinions, values, social and managerial skills, interaction behaviors).
R2, R3, R4, R5, R6	50,00%	Written tests: Objective tests with short and extended responses.
R1, R2, R3, R4, R5, R6	35,00%	Projects. Development and/or design works.

Observations

The exam will consist of:

· A part of between 15 and 30 closed-answer questions (true or false, multiple choice, complete, order) that will count for 40% of the exam grade. One correct answer will be deducted for every three incorrect ones.

· A part of between 3 and 5 theoretical-practical development questions that will count for 60% of the exam grade.

Projects and development work will consist of:

· Classroom practices and questionnaires: 20% of the grade course.

· Work on the design of activities and materials: 15% of the grade course.

Classroom practices are carried out in the classroom, no way will alternative tasks or dates be offered for students who do not attend.

Single assessment:

Exceptionally, those students who, in a justified and accredited manner, cannot undergo the continuous evaluation system, must apply for this evaluation system, request it within the first month of each semester from their teacher and receive approval. In that case they will be evaluated as follows:

- Exam with the same format described above: 70% of the course grade.
- Work on the design of activities and materials: 15% of the course grade.
- Oral presentation of individual or group work:15% of the grade.

Further observations:

It is an essential requirement to pass the subject to pass each section.

It is an essential requirement to pass the subject that the student does not make more than 3 serious misspellings in each written test (both assignments and practices as well as the theoretical-practical exam).

The marks of the different sections of one course will not be saved for another.

The delivery of the works and practices must be done in a timely manner within the periods established by the professor of the subject.

Online teaching

Assessed learning outcomes	Granted percentage	Assessment method
R2, R3, R4, R5, R6	50,00%	Written tests: short-answer objective tests, developmental tests. Projects. Reports/Practical reports. Design work, development
R1, R2, R3, R4, R5, R6	15,00%	Exposición oral de trabajos grupales e individuales: sistemas de autoevaluación (oral, escrita, individual, en grupo). Pruebas orales (individual, en grupo, presentación de temas-trabajos)
	0,00%	Monitoring of student work in non-face-to-face/distance sessions: Observation techniques, rubrics, checklists. Portfolios.
	0,00%	Active participation in theoretical-practical sessions, seminars, and tutorials: Attitude scale (to gather opinions, values, social and managerial skills, interaction behaviors).
R1, R2, R3, R4, R5, R6	35,00%	Projects. Development and/or design works.

Observations

The exam will consist of:

·A part of between 15 and 30 closed-answer questions (true or false, multiple choice, complete, order) that will count for 40% of the exam grade. One correct answer will be deducted for every three incorrect ones.

·A part of between 3 and 5 theoretical-practical development questions that will count for 60% of the exam grade.

Projects and development work will consist of:

Classroom practices, questionnaires and work on the design of activities and materials.

Observations:

It is an essential requirement to pass the subject to pass each section.

It is an essential requirement to pass the subject that the student does not make more than 3 serious misspellings in each written test (both assignments and practices as well as the theoretical-practical exam).

The marks of the different sections of one course will not be saved for another.

The delivery of the works and practices must be done in a timely manner within the periods established by the professor of the subject.

CRITERIA FOR THE AWARDING OF HONOURS:

In accordance with the regulations governing the assessment and grading of subjects in force at UCV, the distinction of "Matrícula de Honor" (Honours with Distinction) may be awarded to students who have achieved a grade of 9.0 or higher. The number of "Matrículas de Honor" (Honours with Distinction) may not exceed five percent of the students enrolled in the group for the corresponding academic year, unless the number of enrolled students is fewer than 20, in which case a single "Matrícula de Honor" (Honours with 9 Distinction) may be awarded. Exceptionally, these distinctions may be assigned globally across different groups of the same subject. Nevertheless, the total number of distinctions awarded will be the same as if they were assigned by group, but they may be distributed among all students based on a common criterion, regardless of the group to which they belong. The criteria for awarding "Matrícula de Honor" (Honours with Distinction) will be determined according to the guidelines stipulated by the professor responsible for the course, as detailed in the "Observations" section of the evaluation system in the course guide.

Learning activities

The following methodologies will be used so that the students can achieve the learning outcomes of the subject:

- M1 Participatory Master Class
- M2 Case Study
- M5 Seminar Work
- M6 Problem-based Learning
- M7 Cooperative/Collaborative Work
- M9 Group and Individual Tutoring

- M10 Individual Tutoring
- M11 Participatory Master Class
- M12 Case Study
- M13 Seminar Work
- M17 Problem-based Learning
- M18 Cooperative/Collaborative Work
- M19 Individual Tutoring
- M20 Group and Individual Tutoring

IN-CLASS LEARNING

IN-CLASS LEARNING ACTIVITIES

	LEARNING OUTCOMES	HOURS	ECTS
Group Work Presentation M1, M7	R1, R2, R3, R4, R5, R6	16,50	0,66
Theoretical Class M1, M6, M7	R1, R2, R3	15,00	0,60
Practical Class M6, M7, M9, M10	R1, R2, R3, R4, R5, R6	21,00	0,84
Tutoring M9, M10	R1, R2, R3, R4	5,50	0,22
Evaluation M1, M6	R1, R2, R3, R4, R5, R6	2,00	0,08
TOTAL		60,00	2,40

LEARNING ACTIVITIES OF AUTONOMOUS WORK

	LEARNING OUTCOMES	HOURS	ECTS
Group work M7	R1, R2, R3, R4, R5, R6	22,20	0,89
Individual work M10	R2, R3, R4, R5, R6	67,80	2,71
TOTAL		90,00	3,60

ON-LINE LEARNING

SYNCHRONOUS LEARNING ACTIVITIES

	LEARNING OUTCOMES	HOURS	ECTS
Theoretical class (e-learning mode) M11	R1, R2, R3, R4, R5, R6	25,00	1,00
Practical class (e-learning mode) M12, M17, M18, M20	R1, R2, R3, R4, R5, R6	21,00	0,84
Individual tutoring (e-learning mode) M19	R2, R3, R4, R5, R6	3,00	0,12
Evaluation (e-learning mode) M12, M17	R2, R3, R4, R5, R6	4,00	0,16
TOTAL		53,00	2,12

ASYNCHRONOUS LEARNING ACTIVITIES

	LEARNING OUTCOMES	HOURS	ECTS
Individual work Activities (e-learning mode) M12, M17, M19	R1, R2, R3, R4, R5, R6	67,50	2,70
Group Work (e-learning mode) M12, M17	R1, R2, R3, R4, R5, R6	21,50	0,86
Asynchronous Tutoring (e-learning mode) M19	R1, R2, R3, R4, R5, R6	1,00	0,04
Theoretical-Practical Class (distance mode) M11	R1, R2, R3, R4, R5, R6	7,00	0,28
TOTAL		97,00	3,88

Description of the contents

Description of the necessary contents to acquire the learning outcomes.

Theoretical contents:

Content block	Contents
Introduction	<ul style="list-style-type: none">·Mathematical learning and teaching theories·Mathematical learning difficulties·Scholar curriculum of Mathematics for Elementary School.·Classification of instructional materials and resources.·Problem solving: What is a problem? Polya fases in problem solving. Difficulties in problem solving
Didactics of Arithmetics	<ul style="list-style-type: none">·Didactic sequence example.·Arithmetics learning difficulties.·Instructional materials and resources: analysis and design.·Arithmetic problems solving.·Activities proposal.
Didactics of Geometry	<ul style="list-style-type: none">·Didactic sequence example.·Geometry learning difficulties.·Instructional materials and resources: analysis and design.·Geometric problems solving.·Activities proposal.
Didactics of Measure	<ul style="list-style-type: none">· Didactic sequence example· Measure learning difficulties· Instructional materials and resources: analysis and design· Measure problems solving· Activities proposal

Didactics of Statistics and Probability

- Didactic sequence example.
- Statistics and probability learning difficulties.
- Instructional materials and resources: analysis and design.
- Statistics and probability problems solving.
- Activities proposal.

Temporary organization of learning:

Block of content	Number of sessions	Hours
Introduction	5,00	10,00
Didactics of Arithmetics	9,00	18,00
Didactics of Geometry	6,00	12,00
Didactics of Measure	6,00	12,00
Didactics of Statistics and Probability	4,00	8,00
