Learning outcomes

At the end of the course, the student must be able to prove that he/she has acquired the following learning outcomes:

- R1 The student describes the phenomenon of globalization and relates it to the characteristics of current society: demographic situation, unemployment, cultural diversity, and inequality.
- R2 The student identifies patterns of social relationships and determines appropriate ones in a multicultural society.
- R3 The student designs socio-educational proposals for intercultural education.

Competencies

Depending on the learning outcomes, the competencies to which the subject contributes are (please score from 1 to 4, being 4 the highest score):

GENERAL		Weighting			
		1	2	3	4
CG4	Design and regulate learning spaces in diverse contexts that address gender equality, equity, and respect for human rights, which form the values of citizenship education.				X
CG5	Promote a positive coexistence inside and outside of the classroom, resolve discipline issues, and contribute to peaceful resolution of conflicts. Encourage and value effort, perseverance, and personal discipline in students.			X	
CG7	Know the organization of primary education schools and the diversity of actions involved in their functioning. Perform tutoring and orientation with students and their families, addressing the singular educational needs of the students. Recognize that the exercise of the teaching function must go on improving and adapting to the scientific, pedagogical, and social changes throughout life.				X
CG8	Maintain a critical and autonomous relationship with knowledge, values, and public and private social institutions.			X	
CG11	Know and apply information and communication technologies in the classrooms. Selectively discern audiovisual information that contributes to learning, civic education, and cultural enrichment.				X
CG12	Understand the function, possibilities, and the limits of education in today's society and the fundamental competencies that affect primary education schools and their professionals. Know the models of quality improvement applied to educational institutions.	X			
SPECIFIC		Weighting			
		1	2	3	4
CE18	Show social skills to understand families and be understood by them.	X

CE20	Relate education with the environment and cooperate with families and the community.	X		
CE21	Analyze and critically incorporate the most relevant issues of current society that affect family and school education: the educational social impact of audiovisual languages and screens; changes in gender and intergenerational relationships; multiculturalism and interculturalism; discrimination and social inclusion, and sustainable development.			X
CE22	Understand the historical evolution of the family, different types of families, lifestyles, and education within the family context.	X		

Assessment system for the acquisition of competencies and grading system

In-class teaching

Assessed learning outcomes	Granted percentage	Assessment method
R1, R2, R3	10,00%	Oral presentation of group and individual works: Self-assessment systems (oral, written, individual, in groups). Oral tests (individual, in groups, presentation of topics or works).
R1, R2, R3	40,00%	Written tests: Objective tests with short and extended responses.
R1, R2, R3	20,00%	Projects. Development and/or design works.
R1, R2, R3	30,00%	Reports/Practice reports.

Observations

In order to pass the course, it is necessary to demonstrate in all oral and written productions an advanced level of linguistic proficiency, so as to achieve at the end of the degree the C1 level, as required by the official Memory of the degree. Therefore, each spelling mistake will be, consequently, penalized in papers and exams with 0.50 points. Three missing accents will be equivalent to one spelling mistake.

The oral presentation of group and individual work will consist of the preparation and participation in a classroom debate (10%).

The written test (40%) will be based on a multiple-choice exam (30%) and a development question (10%) in which students will be asked to relate some of the contents taught in the course. In this sense, it will be necessary to pass the written test to apply in the final computation of the grade of the course the rest of the grades obtained in the established activities.

For the overcoming of the 20% corresponding to the section of projects. Development and/or design work, the student will be asked to design and elaborate a socio-educational proposal in intercultural education throughout the course, and its exhibition to be carried out in the classroom. The 30% related to reports/memories of practices, will be distributed as follows: (10%) will consist of the completion of a group work based on selection of news in the media with the issues raised in the subject and its subsequent analysis, another (10%) may be achieved after viewing digital resources, a film or video, and the completion of a subsequent task related to such viewing, the remaining 10% will be obtained through active participation in the sessions, according to the teacher's discretion as to the quality of student contributions (monitoring sheet per session).

In this sense, it will be necessary to pass the written test in order to apply the rest of the grades obtained in the established activities in the final computation of the grade of the course. The remaining 40% will be divided into a 10% that will consist of the realization of a group work based on the selection of news in the media with the issues raised in the subject and its subsequent analysis, another 10% can be achieved after viewing digital resources, a film or video, and the completion of a subsequent task related to such viewing, the remaining 10% will be obtained through active participation in the sessions, at the discretion of the teacher regarding the quality of the student's contributions (monitoring sheet per session). CRITERIA FOR THE AWARDING OF HONOURS:

In accordance with the regulations governing the assessment and grading of subjects in force at UCV, the distinction of "Matrícula de Honor" (Honours with Distinction) may be awarded to students who have achieved a grade of 9.0 or higher. The number of "Matrículas de Honor" (Honours with Distinction) may not exceed five percent of the students enrolled in the group for the corresponding academic year, unless the number of enrolled students is fewer than 20, in which case a single "Matrícula de Honor" (Honours with 9 Distinction) may be awarded. Exceptionally, these distinctions may be assigned globally across different groups of the same subject. Nevertheless, the total number of distinctions awarded will be the same as if they were assigned by group, but they may be distributed among all students based on a common criterion, regardless of the group to which they belong. The criteria for awarding "Matrícula de Honor" (Honours with Distinction) will be determined according to the guidelines stipulated by the professor responsible for the course, as detailed in the "Observations" section of the evaluation system in the course guide.
