

Information about the subject

Degree: Bachelor of Science Degree in Human Nutrition and Dietetics

Faculty: Faculty of Medicine and Health Sciences

Code: 1311103 **Name:** Biostatistics

Credits: 6,00 **ECTS Year:** 1 **Semester:** 1

Module: Basic Science Module

Subject Matter: Statistics **Type:** Basic Formation

Field of knowledge: Health Sciences

Department: Biostatistics, Epidemiology, and Public Health

Type of learning: Classroom-based learning

Languages in which it is taught: Spanish

Lecturer/-s:

131A

Marcelino Perez Bermejo (**Responsible Lecturer**)

marcelino.perez@ucv.es

Module organization

Basic Science Module

| Subject Matter | ECTS | Subject | ECTS | Year/semester |
|----------------|-------|---------------------------------|------|---------------|
| Biology | 6,00 | Biology and Genetics | 6,00 | 1/1 |
| Biochemistry | 6,00 | Biochemistry | 6,00 | 1/2 |
| Chemistry | 12,00 | Basic Fundamentals of Chemistry | 6,00 | 1/1 |
| | | Organic Chemistry | 6,00 | 1/2 |
| Physiology | 12,00 | Physiology | 6,00 | 1/2 |
| | | Physiology II | 6,00 | 2/1 |
| Statistics | 6,00 | Biostatistics | 6,00 | 1/1 |
| Human Anatomy | 6,00 | Human Anatomy | 6,00 | 1/1 |
| Psychology | 6,00 | Psychology | 6,00 | 2/1 |
| Anthropology | 12,00 | Anthropology | 6,00 | 1/1 |
| | | Food and Culture | 6,00 | 4/1 |

Recommended knowledge

This subject does not have any prerequisites.

Learning outcomes

At the end of the course, the student must be able to prove that he/she has acquired the following learning outcomes:

- R1 Understands and assimilates the concepts included in the content of the course.
- R2 Shows ability to solve problems related to these contents using different resources.
- R3 Understands and adequately uses language, as well as a correct writing and presentation of data.
- R4 Collaborates with the teacher and classmates throughout the learning process: Attendance to theoretical, practical or tutoring sessions; teamwork; Respect in the treatment; Compliance with the rules of organization of the subject for the benefit of all.

Competencies

Depending on the learning outcomes, the competencies to which the subject contributes are (please score from 1 to 4, being 4 the highest score):

| BASIC | Weighting | | | |
|--|-----------|---|---|---|
| | 1 | 2 | 3 | 4 |
| CB1 Students demonstrate knowledge and understanding in an area of study that is at the core of general secondary education, and is often at a level that, while supported by advanced textbooks, also includes some aspects that involve knowledge from the cutting edge of their field of study. | | | X | |

| GENERAL | Weighting | | | |
|---|-----------|---|---|---|
| | 1 | 2 | 3 | 4 |
| CG03 Students recognise the need to maintain and update professional competence, with particular emphasis on autonomous and continuous learning of new knowledge, products and techniques in nutrition and food, as well as motivation for quality. | | | X | |

| SPECIFIC | Weighting | | | |
|--|-----------|---|---|---|
| | 1 | 2 | 3 | 4 |
| CE03 Students know the statistics applied to Health Sciences. To know the psychological bases and the bio-psycho-social factors that affect human behaviour. | | | | X |

Assessment system for the acquisition of competencies and grading system

| Assessed learning outcomes | Granted percentage | Assessment method |
|----------------------------|--------------------|---|
| | 5,00% | Evaluation of the use of the practical classes in the classroom, of problems or computers, seminars and tutorials. Through attendance, and participation in the different activities proposed. |
| | 65,00% | Written evaluation of the knowledge and skills obtained. The test may consist of a series of open-ended or multiple-choice questions on the theoretical content of the subject and/or practical exercises (problem solving). |
| | 30,00% | Evaluation of individual or group practices or activities, in which information related to each of the subjects must be sought and structured, and cases or problems resolved. This is done through a system of continuous evaluation throughout the course, which involves the delivery and / or exposure of work, whose objectives and content will be proposed by the teacher. |

Observations

A minimum grade of 5 to averaging is needed.

MENTION OF DISTINCTION:

In accordance with the regulations governing the assessment and grading of subjects in force at UCV, the distinction of "Matrícula de Honor" (Honours with Distinction) may be awarded to students who have achieved a grade of 9.0 or higher. The number of "Matrículas de Honor" (Honours with Distinction) may not exceed five percent of the students enrolled in the group for the corresponding academic year, unless the number of enrolled students is fewer than 20, in which case a single "Matrícula de Honor" (Honours with Distinction) may be awarded. Exceptionally, these distinctions may be assigned globally across different groups of the same subject. Nevertheless, the total number of distinctions awarded will be the same as if they were assigned by group, but they may be distributed among all students based on a common criterion, regardless of the group to which they belong. The criteria for awarding "Matrícula de Honor" (Honours with Distinction) will be determined according to the guidelines stipulated by the professor responsible for the course, as detailed in the "Observations" section of the evaluation system in the course guide.

Learning activities

The following methodologies will be used so that the students can achieve the learning outcomes of the subject:

- M1 Exposition of contents by the teacher, analysis of competencies, explanation and demonstration of capacities, skills and knowledge in the classroom. The blackboard, the computer and the cannon will be used to display texts, graphics, etc.
- M2 Resolution of practical exercises and case studies, analysis of evaluation procedures and procedural intervention. All this with the support of the teacher. This aspect can be controlled through attendance and active participation in the practical sessions.
- M3 Resolution of practical exercises and case studies, analysis of evaluation procedures and procedural intervention. All this with the support of the teacher. This aspect can be controlled through attendance and active participation in the practical sessions.
- M5 Student study: individual preparation of readings, essays, problem solving, seminars, papers, reports, etc. for discussion or delivery in electronic format.
- M7 Personalised attention and in small groups. Period of instruction and/or orientation carried out by a tutor with the aim of reviewing and discussing the materials and topics presented in the classes, seminars, readings, completion of assignments, etc. The attendance of the student and his/her level of gradual development in the knowledge of the subjects will be evaluated.
- M8 A set of tests, written or oral, used in the evaluation of the student.

IN-CLASS LEARNING ACTIVITIES

| | LEARNING OUTCOMES | HOURS | ECTS |
|---------------------------|-------------------|--------------|-------------|
| Theoretical lessons M1 | R1, R2, R3, R4 | 31,00 | 1,24 |
| Practice lessons M2 | R1, R2, R3, R4 | 25,00 | 1,00 |
| Office Hours M7 | R4 | 2,00 | 0,08 |
| Evaluation M8 | R1, R2, R3, R4 | 2,00 | 0,08 |
| TOTAL | | 60,00 | 2,40 |

LEARNING ACTIVITIES OF AUTONOMOUS WORK

| | LEARNING OUTCOMES | HOURS | ECTS |
|---------------------------|-------------------|--------------|-------------|
| Autonomous work M3, M5 | R1, R2, R3, R4 | 70,00 | 2,80 |
| Group work M3, M7 | R1, R2, R3, R4 | 20,00 | 0,80 |
| TOTAL | | 90,00 | 3,60 |

Description of the contents

Description of the necessary contents to acquire the learning outcomes.

Theoretical contents:

| Content block | Contents |
|--|---|
| Descriptive statistics | Description of samples and populations. Types of variables. Frequency distribution. Location and dispersion measurements. Description of a population: population parameters |
| Introduction to probability | Introduction to probability. Independent and dependent events. Bayes formula. Random sampling: types and features. Probability, discrete and continuous distributions. |
| Sampling distribution Confidence intervals | The sampling distribution: mean, variance, proportions. The difference in average sample sampling distribution. Confidence intervals for different population parameters. Determination of the sample size. |
| Hypothesis contrasts | Hypothesis contrasts: stages. Types of errors in contrast. T and Chi-square test. Concept of p-value: calculation. |
| ANOVA | randomized. Fundamental relations of ANOVA: test F. course for applying ANOVA. Multiple comparison procedures. Logistics and linear regressions |

Temporary organization of learning:

| Block of content | Number of sessions | Hours |
|--|--------------------|-------|
| Descriptive statistics | 5,00 | 10,00 |
| Introduction to probability | 6,00 | 12,00 |
| Sampling distribution Confidence intervals | 5,00 | 10,00 |
| Hypothesis contrasts | 6,00 | 12,00 |
| ANOVA | 8,00 | 16,00 |

Addendum to the Course Guide of the Subject

Due to the exceptional situation caused by the health crisis of the COVID-19 and taking into account the security measures related to the development of the educational activity in the Higher Education Institution teaching area, the following changes have been made in the guide of the subject to ensure that Students achieve their learning outcomes of the Subject.

Situation 1: Teaching without limited capacity (when the number of enrolled students is lower than the allowed capacity in classroom, according to the security measures taken).

In this case, no changes are made in the guide of the subject.

Situation 2: Teaching with limited capacity (when the number of enrolled students is higher than the allowed capacity in classroom, according to the security measures taken).

In this case, the following changes are made:

1. Educational Activities of Onsite Work:

All the foreseen activities to be developed in the classroom as indicated in this field of the guide of the subject will be made through a simultaneous teaching method combining onsite teaching in the classroom and synchronous online teaching. Students will be able to attend classes onsite or to attend them online through the telematic tools provided by the university (videoconferences). In any case, students who attend classes onsite and who attend them by videoconference will rotate periodically.

In the particular case of this subject, these videoconferences will be made through:

Microsoft Teams

Kaltura

Situation 3: Confinement due to a new State of Alarm.

In this case, the following changes are made:

1. Educational Activities of Onsite Work:

All the foreseen activities to be developed in the classroom as indicated in this field of the guide of the subject, as well as the group and personalized tutoring, will be done with the telematic tools provided by the University, through:

Microsoft Teams

Kaltura

Explanation about the practical sessions:

Para las sesiones prácticas se utilizará el software fStats programado en Excel, por lo que se necesitará que los alumnos que no la tengan, se la descarguen (gratuita) de Microsoft 365 para poder trabajar en casa. El profesor dará instrucciones en su caso para que lo puedan hacer.

2. System for Assessing the Acquisition of the competences and Assessment System

ONSITE WORK

Regarding the Assessment Tools:

The Assessment Tools will not be modified. If onsite assessment is not possible, it will be done online through the UCVnet Campus.

The following changes will be made to adapt the subject's assessment to the online teaching.

| Course guide | | Adaptation | |
|-----------------|----------------------|--------------------------------------|---------------------|
| Assessment tool | Allocated percentage | Description of the suggested changes | Platform to be used |

The other Assessment Tools will not be modified with regards to what is indicated in the Course Guide.

Comments to the Assessment System:
