Assessment system for the acquisition of competencies and grading system

In-class teaching

Assessed learning outcomes	Granted percentage	Assessment method
R1, R2, R3, R4	50,00%	Oral and/or written tests employed in initial, training and/or summative student assessment.
R1, R2, R3, R4	35,00%	Presentation of practical activities.
R1, R2, R3, R4	15,00%	Attendance and active participation: lessons, group assignments and tutoring sessions. It will be monitored and registered by the teacher.

Observations

Attendance monitoring records by the teacher: the student must attend 80% of the sessions to be evaluated on the subject.

Practices will not be collected outside the established deadline and through the medium indicated by the teacher (platform, printed in hand).

Failure to deliver within the established deadline and format (e.g. via platform on a specific date) will result in the evaluation of said practice as not submitted. Practices via e-mail will not be accepted.

Some of the practices can only be delivered if the student has attended class on the dates on which it was worked in the classroom.

A role-playing practice will be carried out in the Gessell room that will be mandatory to pass the subject.

The student may present the practices not delivered or suspended in the next call (February). Continuous evaluation will be carried out by delivering a practice per subject topic and a final theoretical-practical test on an official date.

Those students who have justified non-attendance at the sessions will take a single oral or written theoretical-practical test on an official date.

To pass the subject, the student must separately pass the different evaluation systems (attendance and active participation, practices and exam).

The final grade (once the pass is obtained in each of the parts) will be obtained by adding all the grades. If you do not obtain approval – in all the parts evaluated – the grade that will appear in the "minutes" will be a weighted grade of less than five.

The criterion for granting Honor Certificates is "Evidence levels of excellence in all skills and learning outcomes" and having a grade higher than 9.5.

Year 2024/2025 290302 - Assessment and Diagnosis II

In accordance with the regulations governing the assessment and grading of subjects in force at UCV, the distinction of "Matrícula de Honor" (Honours with Distinction) may be awarded to students who have achieved a grade of 9.0 or higher. The number of "Matrículas de Honor" (Honours with Distinction) may not exceed five percent of the students enrolled in the group for the corresponding academic year, unless the number of enrolled students is fewer than 20, in which case a single "Matrícula de Honor" (Honours with Distinction) may be awarded.

Exceptionally, these distinctions may be assigned globally across different groups of the same subject. Nevertheless, the total number of distinctions awarded will be the same as if they were assigned by group, but they may be distributed among all students based on a common criterion, regardless of the group to which they belong. The criteria for awarding "Matrícula de Honor" (Honours with Distinction) will be determined according to the guidelines stipulated by the professor responsible for the course, as detailed in the "Observations" section of the evaluation system in the course guide.

Learning activities

M1

The following methodologies will be used so that the students can achieve the learning outcomes of the subject:

Teacher presentation of contents, competency analysis, explanation and demonstration

- of capacities, abilities and knowledge in the classroom (presential modality).

 M2 Teacher-supervised groupwork sessions: case studies, diagnostic tests, problems, fieldwork, IT room, visits, data searches, libraries, web, Internet, etc. Building knowledge significantly through interaction and student activities (presential modality).
- M3 Supervised monographic sessions with shared participation.
