

Information about the subject

Degree: Bachelor of Science Degree in Occupational Therapy

Faculty: Faculty of Psychology

Code: 1120201 **Name:** Orthoprosthetic technical aids

Credits: 6,00 **ECTS Year:** 4 **Semester:** 2

Module: OPTATIVITY

Subject Matter: Therapeutic Applications **Type:** Elective

Field of knowledge: Health Sciences

Department: -

Type of learning: Classroom-based learning

Languages in which it is taught: Spanish

Lecturer/-s:

OPT02 Cesar Rubio Belmonte (**Responsible Lecturer**)

cesar.rubio@ucv.es

Module organization

OPTATIVITY

Subject Matter	ECTS	Subject	ECTS	Year/semester
Therapeutic Applications	12,00	Ergonomics, accessibility and new technologies	6,00	2/1
		Orthoprosthetic technical aids	6,00	4/2

Recommended knowledge

There are no prerequisites. It is advisable to have studied and passed: -Structure and Function of the human body 1 and 2 -Kinesiology -Functional Rehabilitation in Physical Disability

Learning outcomes

At the end of the course, the student must be able to prove that he/she has acquired the following learning outcomes:

- R1 To integrate anatomical and biomechanical concepts as well as theoretical knowledge of orthosis design and prescription, and apply it to orthosis design/manufacture.
- R2 To handle different types of materials and tools used in orthotics.
- R3 To learn about the application of a wide variety of orthoses for various upper limb pathologies, as well as the fundamental criteria and considerations for their design and manufacture.

Competencies

Depending on the learning outcomes, the competencies to which the subject contributes are (please score from 1 to 4, being 4 the highest score):

GENERAL	Weighting			
	1	2	3	4
CG4 To recognise one's own limitations and the need to maintain and keep up to date one's professional competence, focusing specially on the importance of autonomous learning of knowledge and techniques and the desire for quality.		X		
CG13 To determine occupational dysfunctions and needs, to define the planning and to establish Occupational Therapy interventions, using the therapeutic potential of meaningful occupation through the use of activities, with the consent and the participation of individuals and populations.			X	
CG16 To understand the fundamentals of action, indications and efficiency of Occupational Therapy interventions, based on the available scientific evidence				X
SPECIFIC	Weighting			
	1	2	3	4
CE33 To promote health and prevent disability, acquire or recover the occupational activity needed in each part of the life cycle in order to achieve independence and autonomy in the areas of occupational activity of those persons who are at risk, those with organ deficiency, activity limitation and participation and/or social exclusion.		X		
CE37 To know, understand and apply the fundamentals of personal autonomy in everyday life activities with and without adaptations and/or technical help in the life cycle.			X	
CE40 To apply significant activity, ergonomic study, new technologies and assisted technology in Occupational Therapy in the cycle of life .				X
CE48 To use ethical and professional reasoning in an efficient way through the process of Occupational Therapy.			X	

Assessment system for the acquisition of competencies and grading system

Assessed learning outcomes	Granted percentage	Assessment method
R1, R2, R3	40,00%	Written tests: Summative and final theoretical-practical test (open questions, objective test questions, truncated test, etc.) Preparation of field work memoranda, practical case solutions, single cases.
R1, R3	40,00%	Presentation of group and individual works.
R1, R2, R3	20,00%	Individual monitoring of attendance at face-to-face sessions and active participation in theoretical and practical classes, seminars and tutorials.

Observations

The evaluation is continuous and is based on the collection/delivery of evidence of attendance/participation, practical activities and individual and/or group work throughout the semester. All submissions of individual and group work will be made through the UCV VIRTUAL CAMPUS within the deadlines and in the forms specified by the professor of the subject. Late submissions will not be accepted under any circumstances. The assignments that have not yet been submitted will be submitted and evaluated on the official date of the second examination. In addition, a final theoretical-practical test will be held during the official examination period. The official examination dates are set by the Dean's Team of the Faculty according to the periods established in the academic calendar. For changes to examination dates, please refer to the reasons and procedure in Article 12 of the Examination Regulations.

Criteria for Award of Distinction: Evidence of excellence in all competencies and learning outcomes.

Note: In order to pass the course, the student must pass the different assessment systems (attendance and active participation, practical/work and examination) separately. Failure to comply with the rules and deadlines set for the completion of academic activities will invalidate the grade.

In accordance with the regulations governing the assessment and grading of subjects in force at UCV, the distinction of "Matrícula de Honor" (Honours with Distinction) may be awarded to students who have achieved a grade of 9.0 or higher. The number of "Matrículas de Honor" (Honours with Distinction) may not exceed five percent of the students enrolled in the group for the corresponding academic year, unless the number of enrolled students is fewer than 20, in which case a single "Matrícula de Honor" (Honours with Distinction) may be awarded.

Exceptionally, these distinctions may be assigned globally across different groups of the same subject. Nevertheless, the total number of distinctions awarded will be the same as if they were assigned by group, but they may be distributed among all students based on a common criterion, regardless of the group to which they belong. The criteria for awarding "Matrícula de Honor" (Honours with Distinction) will be determined according to the guidelines stipulated by the professor responsible for the course, as detailed in the "Observations" section of the evaluation system in the course guide.

Learning activities

The following methodologies will be used so that the students can achieve the learning outcomes of the subject:

- M1 ON-CAMPUS CLASS
- M2 PRACTICAL CLASSES
- M3 SEMINAR
- M4 GROUP PRESENTATION OF PAPERS
- M5 OFFICE ASSISTANCE
- M6 ASSESSMENT
- M7 GROUP WORK
- M8 INDEPENDENT WORK

IN-CLASS LEARNING ACTIVITIES

	LEARNING OUTCOMES	HOURS	ECTS
ON-CAMPUS CLASS: Teacher presentation of contents, analysis of competences, explanation and in-class display of skills, abilities and knowledge. M1	R1, R2, R3	29,00	1,16
PRACTICAL CLASSES: Group work sessions supervised by the professor. Case studies, diagnostic tests, problems, field work, computer room, visits, data search, libraries, on-line, Internet, etc. Meaningful construction of knowledge through interaction and student activity. M2	R1, R2, R3	10,00	0,40
SEMINAR: Supervised monographic sessions with shared participation M3	R2, R3	7,50	0,30
GROUP PRESENTATION OF PAPERS: Application of multidisciplinary knowledge M4	R2, R3	7,50	0,30
OFFICE ASSISTANCE: Personalized and small group attention. Period of instruction and /or orientation carried out by a tutor to review and discuss materials and topics presented in classes, seminars, eadings, papers, etc. M5	R1, R2, R3	3,00	0,12
ASSESSMENT: Set of oral and/or written tests used in initial, formative or additive assessment of the student M6	R1, R2, R3	3,00	0,12
TOTAL		60,00	2,40

LEARNING ACTIVITIES OF AUTONOMOUS WORK

	LEARNING OUTCOMES	HOURS	ECTS
<p>GROUP WORK: Group preparation of readings, essays, problem solving, seminars, papers, reports, etc. to be presented or submitted in theoretical lectures, practical and/or small-group tutoring sessions. Work done on the university e-learning platform (www.plataforma.ucv.es)</p> <p>M7</p>	R3	40,00	1,60
<p>INDEPENDENT WORK: Student study: Group Individual preparation of readings, essays, problem solving, seminars, papers, reports, etc. to be presented or submitted in theoretical lectures, practical and/or small-group tutoring sessions. Work done on the university e-learning platform (www.plataforma.ucv.es)</p> <p>M8</p>	R1, R2	50,00	2,00
TOTAL		90,00	3,60

Description of the contents

Description of the necessary contents to acquire the learning outcomes.

Theoretical contents:

Content block	Contents
UNIT 1: Anatomical, physiological and histological basics in orthotic construction.	TOPIC 1: Basics of orthotic treatment. TOPIC 2: The Basics of anatomy and architecture of the hand for making orthoses TOPIC 3: Tissue and joint biomechanics applied to the manufacture of orthotics. SEMINAR 1: Review anatomy / kinesiology of the upper limb. PRACTICE 1: Anatomy and architecture of the hand
UNIT 2: Fundamentals of design and construction of orthoses.	TOPIC 4: Systems of nomenclature and classification of orthoses TOPIC 5: Materials and tools for the construction of orthotic TOPIC 6: Principles of design and manufacture of orthoses PRACTICE 2: Nomenclature and classification of orthotic PRACTICE 3: Materials for making orthotics PRACTICE 4: Preparation of patterns as orthotics PRACTICE 5: Precut patterns adaptation
UNIT 3: Orthotics design and manufacture	PRACTICE 6. Digits immobilization splints 1. PRACTICE 7. Digits immobilization splints 2. PRACTICE 8. Immobilization and positioning splints of the thumb. PRACTICE 9. Short spica thumb splint. PRACTICE 10. Intercommissural immobilizing splint and 4th and 5th digit immobilization splint. PRACTICE 11. MTCPF mobilization splint. PRACTICE 12. Tenodesis splint. PRACTICE 13. DIP mobilization splint. PRACTICE 14. MTCPF, PIP and DIP mobilization splint. PRACTICE 15. PIP mobilization splints PRACTICE 16. Case 1: ulnar nerve palsy. PRACTICE 17. Pediatric splints 1: Immobilization of ankle / foot (AFO).

Temporary organization of learning:

Block of content	Number of sessions	Hours
UNIT 1: Anatomical, physiological and histological basics in orthotic construction.	6,00	12,00
UNIT 2: Fundamentals of design and construction of orthoses.	7,00	14,00
UNIT 3: Orthotics design and manufacture	17,00	34,00
