

Information about the subject

Degree: Bachelor of Science Degree in Occupational Therapy

Faculty: Faculty of Psychology

Code: 1122003 **Name:** Medical-surgical conditions II

Credits: 6,00 **ECTS Year:** 2 **Semester:** 2

Module: MEDICAL, SURGICAL AND PSYCHIATRIC AFFECTIONS

Subject Matter: Medical-Surgical Conditions **Type:** Compulsory

Field of knowledge: Health Sciences

Department: -

Type of learning: Classroom-based learning

Languages in which it is taught: Spanish

Lecturer/-s:

1122

Jorge Miguel Lopez Ferrandis (**Responsible Lecturer**)

jm.lopez@ucv.es

Module organization

MEDICAL, SURGICAL AND PSYCHIATRIC AFFECTIONS

Subject Matter	ECTS	Subject	ECTS	Year/semester
Medical-Surgical Conditions	18,00	Medical-surgical conditions I	6,00	2/1
		Medical-surgical conditions II	6,00	2/2
		Medical-surgical conditions III	6,00	3/1
Psychiatry	6,00	Psychopathology and psychological treatments	6,00	3/1
Public Health	6,00	Public health, management and quality of care	6,00	4/2

Recommended knowledge

Not required. It is recommended to have previously studied the Subjects: Structure and Function of the Human Body I and II.

Learning outcomes

At the end of the course, the student must be able to prove that he/she has acquired the following learning outcomes:

- R1 To know the main medical-surgical conditions on which the Occupational Therapist intervenes.
- R2 To know and properly use subject-specific terminology.
- R3 To use, interpret and critically evaluate scientific documents used in the study of medical-surgical conditions.
- R4 To acquire the ability to synthesize and explain basic concepts.

Competencies

Depending on the learning outcomes, the competencies to which the subject contributes are (please score from 1 to 4, being 4 the highest score):

GENERAL		Weighting			
		1	2	3	4
CG2	To know the national and international health organisations, as well as the environments and conditions of the different health systems		X		
CG3	To obtain and use epidemiological data and value trends and risks involved in the taking of health-related decisions			X	
CG9	To recognise the determiners of health on the population, the resources and multidisciplinary teams and the intervention actions, maintenance and promotion of health, at an individual level as well as that of community		X		
CG14	To know, select and apply the appropriate theories, the theoretical frameworks for reference, the models and methods of Occupational Therapy practice to choose or re-establish meaningful occupation, according to the health needs of individuals/populations (promotion of health, prevention and treatment).			X	
CG15	To cooperate with groups and communities to promote the health and wellbeing of their members through participation in meaningful occupation			X	
CG19	To acquire basic knowledge about management and improvement of the quality of Occupational Therapy services considering the advances in health, social care, society and legislation at local, national and international levels, centred on individuals/populations		X		
CG21	To listen actively, to obtain and summarise key information about occupational problems and demands of the individuals/populations and to understand the content of that information.			X	
CG22	To establish an assertive interpersonal communication with all the interlocutors that is relevant during the Occupational Therapy process.		X		

SPECIFIC	Weighting			
	1	2	3	4
CE59 To know and understand medical, surgical and psychiatric knowledge applicable to the human being in all stages of the cycle of life, from infancy to old age, that allow the students to evaluate, synthesise and apply Occupational Therapy treatments.			X	
CE60 To know and understand the physio-pathological process at every stage of the life cycle, identifying the problems and preventive and clinical aspects of the person, in health as well as in illness.			X	
CE61 To know, evaluate, analyse, elaborate and participate in educational programmes and promote health within the scope of Occupational Therapy in order to prevent occupational dysfunctions in general and subsequent to medical, surgical and psychiatric conditions, as well as social exclusion.				X
CE62 To synthesise and apply the relevant knowledge of biological, medical, human, pedagogical, psychological, social, technological and occupational sciences, together with the theories of occupation and participation.				X

Assessment system for the acquisition of competencies and grading system

Assessed learning outcomes	Granted percentage	Assessment method
R1, R2, R3, R4	50,00%	Written tests: Summative and final theoretical-practical test (open questions, objective test questions, truncated test, etc.) Preparation of field work memoranda, practical case solutions, single cases.
R2, R3, R4	30,00%	Presentation of group and individual works.
R1, R2, R3, R4	20,00%	Individual monitoring of attendance at face-to-face sessions and active participation in theoretical and practical classes, seminars and tutorials.

Observations

The evaluation is continuous and is based on the collection/delivery of evidence of attendance/participation, practical activities and individual and/or group work throughout the semester. All submissions of individual and group work will be made through the UCV VIRTUAL CAMPUS within the deadlines and in the forms specified by the professor of the subject. Late submissions will not be accepted under any circumstances. The assignments that have not yet been submitted will be submitted and evaluated on the official date of the second examination.

In addition, a final theoretical-practical test will be held during the official examination period. The official examination dates are set by the Dean's Team of the Faculty according to the periods established in the academic calendar. For changes to examination dates, please refer to the reasons and procedure in Article 12 of the Examination Regulations.

Criteria for Award of Distinction: Evidence of excellence in all competencies and learning outcomes.

Note: In order to pass the course, the student must pass the different assessment systems (attendance and active participation, practical/work and examination) separately. Failure to comply with the rules and deadlines set for the completion of academic activities will invalidate the grade.

In accordance with the regulations governing the assessment and grading of subjects in force at UCV, the distinction of "Matrícula de Honor" (Honours with Distinction) may be awarded to students who have achieved a grade of 9.0 or higher. The number of "Matrículas de Honor" (Honours with Distinction) may not exceed five percent of the students enrolled in the group for the corresponding academic year, unless the number of enrolled students is fewer than 20, in which case a single "Matrícula de Honor" (Honours with Distinction) may be awarded.

Exceptionally, these distinctions may be assigned globally across different groups of the same subject. Nevertheless, the total number of distinctions awarded will be the same as if they were assigned by group, but they may be distributed among all students based on a common criterion, regardless of the group to which they belong. The criteria for awarding "Matrícula de Honor" (Honours with Distinction) will be determined according to the guidelines stipulated by the professor responsible for the course, as detailed in the "Observations" section of the evaluation system in the course guide.

Learning activities

The following methodologies will be used so that the students can achieve the learning outcomes of the subject:

- M1 ON-CAMPUS CLASS
- M2 PRACTICAL CLASSES
- M3 SEMINAR
- M4 GROUP PRESENTATION OF PAPERS
- M5 OFFICE ASSISTANCE
- M6 ASSESSMENT
- M7 GROUP WORK
- M8 INDEPENDENT WORK

IN-CLASS LEARNING ACTIVITIES

	LEARNING OUTCOMES	HOURS	ECTS
ON-CAMPUS CLASS: Teacher presentation of contents, analysis of competences, explanation and in-class display of skills, abilities and knowledge. M1	R1, R2, R3	29,00	1,16
PRACTICAL CLASSES: Group work sessions supervised by the professor. Case studies, diagnostic tests, problems, field work, computer room, visits, data search, libraries, on-line, Internet, etc. Meaningful construction of knowledge through interaction and student activity. M2	R1, R2, R3, R4	10,00	0,40
SEMINAR: Supervised monographic sessions with shared participation M3	R1, R3	7,50	0,30
GROUP PRESENTATION OF PAPERS: Application of multidisciplinary knowledge M4	R2, R3, R4	7,50	0,30
OFFICE ASSISTANCE: Personalized and small group attention. Period of instruction and /or orientation carried out by a tutor to review and discuss materials and topics presented in classes, seminars, eadings, papers, etc. M5	R1, R2, R3, R4	3,00	0,12
ASSESSMENT: Set of oral and/or written tests used in initial, formative or additive assessment of the student M6	R1, R2, R3, R4	3,00	0,12
TOTAL		60,00	2,40

LEARNING ACTIVITIES OF AUTONOMOUS WORK

	LEARNING OUTCOMES	HOURS	ECTS
<p>GROUP WORK: Group preparation of readings, essays, problem solving, seminars, papers, reports, etc. to be presented or submitted in theoretical lectures, practical and/or small-group tutoring sessions. Work done on the university e-learning platform (www.plataforma.ucv.es)</p> <p>M7</p>	R3, R4	40,00	1,60
<p>INDEPENDENT WORK: Student study: Group Individual preparation of readings, essays, problem solving, seminars, papers, reports, etc. to be presented or submitted in theoretical lectures, practical and/or small-group tutoring sessions. Work done on the university e-learning platform (www.plataforma.ucv.es)</p> <p>M8</p>	R1, R2, R3, R4	50,00	2,00
TOTAL		90,00	3,60

Description of the contents

Description of the necessary contents to acquire the learning outcomes.

Theoretical contents:

Content block	Contents
PATHOLOGY MISCELLANEOUS	<ul style="list-style-type: none">25. Diabetes mellitus: types. Acute and chronic complications.26. Acute renal failure syndrome and chronic.27. Digestive Diseases.28. Major hematologic syndromes.
NEUROLOGY	<ul style="list-style-type: none">1. Neurological symptomatology. Major syndromes and diagnostic tests2. Stroke. Ischemia and hemorrhage.3. Multiple Sclerosis4. Parkinson's disease5. Neurodegenerative diseases6. Motor neuron disease: ELA, polio7. Demyelinating diseases.8. Central nervous system trauma. Spinal cord injury9. Cerebral Palsy10. Diseases of the peripheral nerves.11. Polyneuropathies
ONCOLOGY	<ul style="list-style-type: none">12. Bases cancer medical interest from the perspective of occupational therapy.13. Terminology, epidemiology.14. Aftermath of functional impact.

INFECTIOUS DISEASES

15. General concepts in infectious diseases.
16. Antimicrobial therapy.
17. Immunizations.
18. Major infectious syndromes.
19. Tuberculosis.
20. Urinary Tract Infections.
21. Gastroenteritis and enterocolitis.
22. Intra-abdominal infections.
23. Osteoarticular infections.
24. Human immunodeficiency syndrome and other immunodeficiencies

Temporary organization of learning:

Block of content	Number of sessions	Hours
PATHOLOGY MISCELLANEOUS	6,00	12,00
NEUROLOGY	15,00	30,00
ONCOLOGY	4,00	8,00
INFECTIOUS DISEASES	5,00	10,00
