Assessment system for the acquisition of competencies and grading system

Assessed learning outcomes	Granted percentage	Assessment method
R1, R2, R3, R4, R5, R6, R7, R8, R9, R10, R11, R12, R13, R14, R15, R16, R17, R18, R19, R20, R21, R22	25,00%	Attendance and active participation in the face-to-face and practical sessions.
R1, R2, R3, R4, R5, R6, R7, R8, R9, R10, R11, R12, R13, R14, R15, R16, R17, R18, R19, R20, R21, R22	60,00%	Performance of objective tests.
R2, R3, R6, R7, R10, R14, R19, R20, R21, R22	15,00%	Individual theoretical-practical activities that can be evaluated (diagnoses, experts, etc).

Observations

- Active participation is assessed through the practical activities carried out in the classroom (TOOL 1).
- The OBJECTIVE tests are written, multiple-choice tests (TOOL 2).
- To pass the course the student must pass the different evaluation systems separately .
- In order to be awarded the Honors Degree, it will be necessary to demonstrate levels of excellence in all the competencies and learning outcomes.

In accordance with the regulations governing the assessment and grading of subjects in force at UCV, the distinction of "Matrícula de Honor" (Honours with Distinction) may be awarded to students who have achieved a grade of 9.0 or higher. The number of "Matrículas de Honor" (Honours with Distinction) may not exceed five percent of the students enrolled in the group for the corresponding academic year, unless the number of enrolled students is fewer than 20, in which case a single "Matrícula de Honor" (Honours with Distinction) may be awarded.

Exceptionally, these distinctions may be assigned globally across different groups of the same subject. Nevertheless, the total number of distinctions awarded will be the same as if they were assigned by group, but they may be distributed among all students based on a common criterion, regardless of the group to which they belong. The criteria for awarding "Matrícula de Honor" (Honours with Distinction) will be determined according to the guidelines stipulated by the professor responsible for the course, as detailed in the "Observations" section of the evaluation system in the course guide.

Learning activities

The following methodologies will be used so that the students can achieve the learning outcomes of the subject:

- M1 Presentation of contents by the teaching staff, analysis of competencies, explanation and demonstration of capacities, skills and knowledge in the classroom.
- M2 Group work sessions supervised by the teaching staff. Case studies, expert analysis, theoretical analysis, field study, visits to resources, data search (libraries, network, Internet, etc.). Significant construction of knowledge through student interaction and activity. Critical analysis on values and social commitment.
- M4 Student's study -with/without support in the platform- that includes individual preparation of readings, reports, counter reports, evaluations, essays, problem solving, programs, memories, etc. to expose or deliver in the theoretical classes, practical classes and/or tutorials.
- M7 Personalized attention and in small groups during the period of instruction and/or orientation carried out by a tutor or mentor with the objective of reviewing and discussing the materials and topics presented in the sessions, seminars, readings, completion of papers, etc.
- M9 Set of oral and/or written tests used in the initial, formative or additive evaluation of the student.
